

We are DFA.

- DFA is 17,000 farm families on 9,500 member farms throughout America. These members own, govern and control DFA.
- While DFA has a diverse membership — including large and small dairy farms — a majority of our 17,000 members milk 60 cows or less.
- Of all the milk produced in the United States today, only 20 percent is produced by DFA members.
- Dairy farmers, including DFA members, have suffered because milk prices have gone down, while costs of production have gone up.
- Every dairy farmer has a right to join — or leave — DFA each year.
- DFA is one of approximately 150 milk marketing cooperatives in the United States.
