

HELPING YOU
PREPARE FOR THE
UNEXPECTED.

THAT'S MORE COOPERATIVE.

Dealing with the unexpected is a way of life on the farm, whether it's your equipment, the weather, markets or the local business environment. Having a line of credit in place can help you take advantage of business opportunities and ease the pain of an unforeseen breakdown. DFA Financing, provided by Agri-Max Financial Services, can help.

Our lines of credit provide the cash you need, when you need it. Have funds on hand when your seed dealer offers his best discount or ensure you can get back to work quickly when you have an equipment breakdown. Whatever your needs, all it takes is one call.

Benefits of securing a line of credit:

- Negotiate the best price on seed, fertilizer, equipment repairs and more
- 12-month payback allows you to spread your cash flow over an entire year
- Capital lines for cattle and equipment purchases feature a flexible, multiyear payback
- Avoid delays in getting the cash you need
- Prepay for year-end purchases as part of your tax-planning strategy
- A revolving line for ongoing operating and capital needs may be available
